## **Objective: Job as a Web developer.**

Dear Sir/Madam,

I am a skilled student currently pursuing my Bachelor of Software and Telecommunication Engineer at Antonine University. I would like to be part of your team with a goal to gain experience within a large company with worldwide service background. This opportunity will help me test my skills and learn more on how to work as a group team.

My passion for Web development started this summer as I was undergoing my internship at Entelligence L.L.C, a small web and systems company in which I have gained many new experiences and was able to handle their tasks and learned more on how to manage my time. After 3 months of internship with Entelligence, I was able to receive my internship certificate with a really good feedback.

My studies helped me develop certain cultures, some of those cultures are: Programming languages, Web Development and also managing Data Bases.

I am enthusiastic about supporting the work of CME and gaining the experience that this job provides in Web development.

Thank you for taking your time to read my application. I am available for interview at any time and look forward to hearing from you soon.

Yours sincerely,

Joe El Aile.
